Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Monday 22 Mar 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Remaining settled and cloudy today.

Today:
A chance of patchy frost and some fog patches at first but these soon clearing. Otherwise it will be largely dry and cloudy throughout the day. Northern areas will see the best of any bright spells. Maximum temperature 11 deg C (52 deg F).

Tonight:
Cloud will slowly develop further overnight, covering most areas and bringing possible light rain or drizzle. Risk of frost forming under any clear skies in the south of the region. Minimum temperature 4 deg C (39 deg F).

Tuesday:
Another cloudy day for most with patchy drizzle in some areas. Turning breezier throughout the day with outbreaks of rain overnight. Maximum temperature 13 deg C (55 deg F).

Outlook for Wednesday to Friday:
Mostly dry on Wednesday lighter winds. Showers on Thursday with a risk of thunder and hail. Windy on Friday with scattered showers and a further risk of thunder and hail.
